1. PROJECT OVERVIEW

The **Personal Finance & Budget Planner Dashboard** is an advanced Microsoft Excel project developed for financial data analysis, budget tracking, and dashboard visualization.

The project is designed to organize financial records systematically and provide meaningful insights using Excel tools such as Pivot Tables, Charts, KPI Cards, Conditional Formatting, Hyperlinks, and Formulas.

This dashboard helps users monitor income, expenses, savings, and budget performance through an interactive and user-friendly interface.

2. PROJECT OBJECTIVES

The main objectives of this project are:

- Track monthly income and expenses
- Analyze category-wise spending patterns
- Compare budget allocation with actual expenses
- Automate financial calculations using formulas
- Create interactive Excel dashboards
- Perform data cleaning and preprocessing
- Improve financial reporting and visualization
- Build a professional finance analytics system

3. SYSTEM STRUCTURE & WORKBOOK DESIGN

The project is divided into multiple worksheets for organized data management and analysis.

Fig 1: Project Navigation & Welcome Interface

Workbook Structure

1. Welcome Page

- Contains project title and hyperlink-based navigation system.

2. Raw Data

- Stores original financial transaction records.

3. Data Cleaning Process

- Contains all preprocessing and cleaning operations.

4. Cleaned Data

- Stores processed and structured financial dataset.

5. Final Dashboard

- Displays KPI cards, charts, and financial summaries.

6. Pivot Analysis

- Contains summary reports generated using Pivot Tables.

7. Income Analysis

- Tracks monthly income trends and analysis.

8. Expense Analysis

- Analyzes category-wise expenses and spending behavior.

9. Budget Analysis

- Compares allocated budget with actual spending.

3. DATA CLEANING & PREPROCESSING

Before analysis, the dataset was cleaned and standardized using various Excel techniques.

✔ Cleaning Operations Performed

◆ Handling Missing Values

- Blank and unknown entries were identified and corrected.

◆ Text Formatting

- Improper text cases and spacing issues were fixed.

◆ Data Validation

- Dropdown validation was used to avoid incorrect entries.

◆ Duplicate Checking

- Duplicate records were identified and validated.

◆ Standardization

- Category names and payment methods were standardized.

5. EXCEL FEATURES & TOOLS USED

The following Excel tools and technologies were implemented in this project:

- Pivot Tables

- Pivot Charts
- KPI Cards
- Conditional Formatting
- Hyperlinks
- SUMIF Formula
- IF Formula
- Data Validation
- Charts & Graphs
- Slicers & Interactive Filtering

Pivot Analysis						Go to Welcome Page	
Month	Total Income	Total Expense	Total Savings	EMI	Net Surplus	Expense Category	Amount
January	605,000	112,500	106,700	45,300	340500	Investment	344,000

Figure 5: Pivot Table Based Financial Summary Analysis

6. CORE FORMULAS USED

The following Excel formulas were used for financial calculations and dashboard automation:

A. Total Income Formula

= SUM(B4:M4)

Purpose:

Calculates total yearly income from each income source.

B. Expense Analysis Formula

= N4/\$N\$16

Purpose:

Calculates category-wise expense percentage.

C. Budget Analysis Formula

= B4-C4

Purpose:

Calculates remaining budget after expenses.

D. Budget Status Formula

= IF(D4>=0,"Under Budget","Over Budget")

Purpose:

Checks whether spending is under budget or over budget.

7. FINANCIAL ANALYSIS SUMMARY

The financial analysis section provides a detailed comparison between allocated budget and actual expenses across different spending categories. It also highlights income trends, expense patterns, and category-wise financial performance throughout the project dataset.

BUDGET ANALYSIS — PLANNED vs ACTUAL SPENDING				
S BELOW (Blue = Input Cells — change freely)				
Monthly Budget (₹)	Actual (₹)	Variance (₹)	Var %	Status
412,800	344,000	68,800	16.7%	✓ Under Budget
362,400	309,000	53,400	14.7%	✓ Under Budget
94,700	78,900	15,800	16.7%	✓ Under Budget
60,000	70,200	(10,200)	-17.0%	⚠ Over Budget
70,100	55,200	14,900	21.3%	✓ Under Budget
67,200	56,000	11,200	16.7%	✓ Under Budget
35,000	39,400	(4,400)	-12.6%	⚠ Over Budget
49,600	41,300	8,300	16.7%	✓ Under Budget
46,200	32,000	14,200	30.7%	✓ Under Budget
20,000	26,400	(6,400)	-32.0%	⚠ Over Budget
28,400	19,200	9,200	32.4%	✓ Under Budget
27,700	23,100	4,600	16.6%	✓ Under Budget
1,274,100	1,094,700	179,400	14.1%	

Figure6: Budget Planned vs Actual Spending Comparison

8. OVERALL PROJECT METRICS

- Total Income: ₹78,71,000
- Total Expenses: ₹11,39,900
- Total Savings: ₹67,31,100
- Savings Rate: 85.52%
- Expense Ratio: 14.48%

9. DASHBOARD COMPONENTS

The dashboard includes the following components:

- Monthly Income Trend Chart
- Expense Category Analysis Chart
- Budget vs Actual Comparison Chart
- KPI Summary Cards
- Pivot Table Summaries
- Hyperlink Navigation System

Figure 7: Executive Financial Dashboard

10. KEY INSIGHTS

- Investment and Rent categories recorded the highest expenses.
- Savings rate reached 85.52%, indicating strong financial management.
- Expense ratio remained controlled at 14.48%.
- Dashboard KPIs improved financial monitoring and reporting.

11. LEARNING OUTCOMES

Through this project, the following skills were developed:

- Advanced Excel Dashboard Development
- Data Cleaning & Preprocessing
- Pivot Table Analysis
- Formula Automation
- Financial Data Visualization
- Interactive Dashboard Design
- Hyperlink Navigation System

12. CONCLUSION

The Personal Finance & Budget Planner Dashboard demonstrates how Microsoft Excel can be effectively used for financial analysis, budgeting, and dashboard visualization.

This project successfully integrates data cleaning, Pivot Table analysis, formula automation, KPI tracking, and dashboard design techniques to create a structured and professional financial management system.

The project also improved practical knowledge of Excel analytics and real-world financial reporting techniques.

This project can be further enhanced using Power BI and real-time financial automation tools.
